Summary of Requirements

Personal Protective Equipment	For First-aid: Disposable clinical masks to type IIR. Disposable nitrile or vinyl gloves. Disposable aprons. For personal care: Disposable clinical masks to type IIR, Goggles, or wrap around safety glasses that are splash resistant. Disposable nitrile or vinyl gloves. Disposable aprons. For managing people with Covid-19 symptoms: Disposable clinical masks to type IIR, Goggles, or wrap around safety glasses that are splash resistant. For employees accessing communal areas and corridors (should they be requested): Disposable clinical masks to type IIR.

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

Overarching System of Controls

This is the set of actions Nurseries and pre-schools must take. They are grouped into 'prevention' and 'response to any infection' and are outlined in more detail in the document '*Actions for early years and childcare providers during the coronavirus (COVID-19) outbreak*' at:

https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/963510/2020208_actions_for_early_years_and_childcare_providers.pdf

Nursery and pre-school Leaders must make themselves aware of the content of this guidance.

Prevention

You must always:

- 1) Minimise contact with individuals who are required to self-isolate by ensuring they do not attend the school.**
- 2) Ensure face coverings are used in recommended circumstances.**
- 3) Ensure everyone is advised to clean their hands thoroughly and more often than usual.**
- 4) Ensure good respiratory hygiene for everyone by promoting the 'catch it, bin it, kill it' approach.**
- 5) Maintain enhanced cleaning, including cleaning frequently touched surfaces often, using standard products such as detergents.**
- 6) Consider how to minimise contact across the site and maintain social distancing wherever possible.**
- 7) Keep occupied spaces well ventilated.**

In specific circumstances:

- 8) Ensure individuals wear the appropriate personal protective equipment (PPE) where necessary.**
- 9) Promote and engage in asymptomatic testing, where available.**

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

	<p>Response to any infection</p> <p>You must always:</p> <p>10) Promote and engage with the NHS Test and Trace process.</p> <p>11) Manage and report confirmed cases of coronavirus (COVID-19) amongst the school community.</p> <p>12) Contain any outbreak by following local health protection team advice.</p>
--	---

Hazard Identification			Control		Risk
What are the steps of the activity / items of equipment	What are the potential hazards	Score	What methods will be used to reduce the likelihood and/or the consequence of an illness or injury from those hazards	What hazard remains	Residual Score
General site management, access/egress and movement in and around the Nursery/pre-school. (all settings)	Harm to all occupants from direct and indirect contact with Covid-19	6	<p>Children, staff and other people showing symptoms, or have tested positive for Covid-19 in the last 10 days must NOT enter the Nursery/pre-school site.</p> <p>Parents of pupils who are symptomatic, and staff who are symptomatic, are to arrange for a Covid-19 polymerase chain reaction (PCR) test as soon as possible after the onset of symptoms. Wherever possible tests should be booked at a local testing facility to shorten the time taken to obtain results.</p>		3

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

		<p>Nurseries/pre-schools should ask parents and staff to inform them immediately of the results of a test.</p> <p>Where someone tests positive, they should follow the <i>'Stay at home: guidance for households with possible or confirmed coronavirus (COVID-19) infection'</i> and must not attend for at least 10 days from the day after the start of their symptoms or from the test date if they did not have any symptoms but have had a positive test.</p> <p>Everyone in the Nursery/pre-school must follow this process and Nurseries/pre-schools must ensure that everyone onsite or visiting is aware of it. Anyone told to isolate by NHS Test and Trace or by their public health protection team has a legal obligation to self-isolate.</p> <p>Staff in Nurseries/pre-schools will be supplied with LFD test kits to self swab and test themselves twice a week at home. They must report their result to NHS Test and Trace as soon as the test is completed either online or by telephone as per the instructions in the home test kit. They should also share their result, whether void, positive or negative, with their Nursery/pre-school to help with contact tracing.</p> <p>Individuals with a positive LFD test result will need to self-isolate in line with the <i>'Stay at home: guidance for households with possible or confirmed coronavirus (COVID-19) infection'</i>. They will also need to arrange a lab-based polymerase chain reaction (PCR) test to confirm the result if the test was done at home.</p> <p>A child or staff member who tested positive for coronavirus (COVID-19) can return to their normal routine and stop self-isolating after they have finished</p>		
--	--	---	--	--

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

			<p>their isolation period and their symptoms have gone or if they continue to have only a residual cough or anosmia. This is because a cough or anosmia can last for several weeks once the infection has gone. If they still have a high temperature after 10 days or are otherwise unwell, you should advise them to stay at home and seek medical advice.</p> <p>Staff with a negative LFD test result can continue to attend Nursery/pre-school unless they have individually been advised otherwise by NHS Test and Trace or Public Health professionals (for example as a close contact). They should continue to apply the measures in the system of controls to themselves and the wider Nursery/pre-school setting.</p> <p>Children and staff living with someone who is showing symptoms, or has tested positive in the last 10 days, must not attend for at least 10 days from the day after the start of the person’s symptoms, or from their test date if they did not have any symptoms but have had a positive test.</p> <p>A child with symptoms should not attend Nursery/pre-school, given the potential risk to others. In the event that a parent or guardian insists on a child attending school, Nursery/pre-school can take the decision to refuse the child if in their reasonable judgement it is necessary to protect their children and staff from possible infection with coronavirus (COVID-19). Any such decision would need to be carefully considered by the Headteacher in light of all the circumstances and the current public health advice. Headteachers are to liaise with their Director of Education prior to implementing such action.</p>		
--	--	--	---	--	--

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

			<p>There may be situations where a child needs to attend more than one setting. Parents and carers should be encouraged to limit the number of settings their child attends, ideally ensuring their child only attends the same setting consistently. This should also be the same for staff.</p> <p>Where a child routinely attends more than one setting on a part time basis, settings are to encourage parents and carers to work through the 'system of controls' collaboratively with you to address any risks identified and allow you to jointly deliver appropriate care for the child.</p> <p>Public Health England has good evidence that routinely taking the temperature of children is not recommended as this is an unreliable method for identifying coronavirus (COVID-19). Consequently, TKAT Nurseries/pre-schools should not be using this method.</p> <p>Emergency evacuation Nurseries/pre-schools are to revisit their evacuation plans to ensure, as much as possible, minimum contact between bubbles during the evacuation process. Nurseries/pre-schools should consider potential choke points and resulting crowding. Wider spacing at assembly areas between bubbles will be required. A fire drill should be conducted in a timely fashion to test the plan after changes to Covid-19 arrangements.</p> <p>Settings are to provide adequate hand washing/sanitising facilities to prevent crowding and reduce cross contamination.</p>		
--	--	--	--	--	--

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

			<p>Settings are to provide information on how to wash hands properly and display posters.</p> <p>Staff must wash their hands for 20 seconds, or sanitise their hands using a hand sanitiser with an alcohol content $\geq 70\%$; on arrival at the setting, before and after eating, after sneezing or coughing.</p> <p>Children must wash their hands for 20 seconds; on arrival at the setting, before and after eating, after sneezing or coughing.</p> <p>Nurseries/pre-schools are to have a process for removing face coverings when staff who use them arrive at school and/or need to change or remove/replace face coverings during the day. This must be communicated clearly to them.</p> <p>Face coverings are to be worn by all employees, and visitors in corridors and communal areas (other than when eating).</p> <p>Some individuals are exempt from wearing face coverings. This applies to those who:</p> <ul style="list-style-type: none"> ● cannot put on, wear or remove a face covering because of a physical or mental illness or impairment or disability ● speak to or provide assistance to someone who relies on lip reading, clear sound or facial expression to communicate <p>A system of cleaning frequently touched communal surfaces more regularly than normal must be put in place. Cleaning of such surfaces should initially be completed to a good standard using a suitable detergent to remove all dirt. Then, cleaned frequently during the day using an appropriate anti-viral cleaner.</p>		
--	--	--	--	--	--

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

			<p>A combination detergent and anti-viral cleaner can be used. Items such as door pushes/handles, door edges, sinks/taps, toilet flushes, light switches, bannisters, gates, call buttons and push pads, till/servery areas, and photocopier controls would be considered as frequently touched areas. A log of the completed cleaning is to be maintained.</p> <p>Rooms should be accessed directly from outside where possible.</p> <p>It is important to ensure it is well ventilated and a comfortable teaching and working environment is maintained.</p> <p>This can be achieved by a variety of measures including:</p> <ul style="list-style-type: none"> ● mechanical ventilation systems – these should be adjusted to increase the ventilation rate wherever possible, and checked to confirm that normal operation meets current guidance (if possible, systems should be adjusted to full fresh air or, if not, then systems should be operated as normal as long as they are within a single room and supplemented by an outdoor air supply) ● natural ventilation – opening windows (in cooler weather windows should be opened just enough to provide constant background ventilation, and opened more fully during breaks to purge the air in the space). Opening internal doors can also assist with creating a throughput of air. <p>To balance the need for increased ventilation while maintaining a comfortable temperature, the following measures should also be used as appropriate:</p>		
--	--	--	---	--	--

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

- opening high level windows in preference to low level to reduce draughts
- increasing the ventilation while spaces are unoccupied (e.g. between classes, during break and lunch, when a room is unused)
- providing flexibility to allow additional, suitable indoor clothing.
- rearranging furniture where possible to avoid direct drafts

Heating should be used as necessary to ensure comfort levels are maintained particularly in occupied spaces.

School kitchens must comply with the guidance for food businesses on coronavirus (COVID-19).
<https://www.gov.uk/government/publications/covid-19-guidance-for-food-businesses/guidance-for-food-businesses-on-coronavirus-covid-19>

The use of mobile phones, unless required for operational reasons, is discouraged, as this can add to potential cross contamination of surfaces.

Stagger arrival times and break times (including lunch), so that all children are not moving around the Nursery/pre-school at the same time

Use the timetable and selection of classroom or other learning environments to reduce movement around the school or building, keeping groups apart.

Considering one-way circulation, or place a divider down the middle of the corridor to keep groups apart as they move through the setting where spaces are accessed by corridors.

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

			<p>Limited toilet breaks so that children don't gather at the toilets. Nurseries/pre-schools to set clear rules around use of toilet facilities by children.</p> <p>Outdoor equipment/apparatus/play equipment/climbing frames can be used but must be cleaned frequently. Cleaning must take place between bubbles if different bubbles use the equipment.</p> <p>Areas of artificial turf can be used, but must be cleaned where appropriate. If such areas are used as play areas for small children, they must be cleaned between bubbles and after use. This can be achieved using a spray and brush method using a disinfectant cleaner that kills 99.9% of bacteria and viruses. Do not allow the area to be used until the area has dried. If artificial turf areas are used for general sport it will not be necessary to clean these surfaces.</p> <p>Groups should be kept apart, meaning that nurseries/pre-schools should avoid large gatherings such as assemblies or collective worship with more than one group.</p> <p>Dining areas can be used, but group timings are to be staggered. Tables equipment and frequently touched surfaces should be cleaned between each group.</p> <p>Settings are to put in place monitoring and supervision to make sure people are following controls put in place, eg following hygiene procedures, cleaning hands, following one-way systems.</p>		
--	--	--	---	--	--

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

			<p>Disposable gloves are to be available to employees should they need them for transferring equipment/resources safely between groups.</p> <p>Put systems in place to keep PPE and essential cleaning supplies under review so you can take action if necessary before you run out.</p> <p>No one is obliged to work in a work environment that has not been risk assessed as per this risk assessment.</p>		
Offices and other non-pupil areas (all settings)	Harm to staff and visitors from direct contact with Covid-19	9	<p>Employees that have increased vulnerability to Covid-19 and are unable to complete a child facing role due to that vulnerability will usually be office based, where they are required to attend the workplace. Consequently, it is important for Nurseries/pre-schools to minimise the risk to such employees by providing as safe a working environment as possible.</p> <p>Make every reasonable effort to comply with the social distancing guidelines set out by the government (keeping people 2m apart wherever possible).</p> <p>Use floor tape to mark areas to help workers keep to a 2m distance.</p> <p>Where the social distancing guidelines cannot be followed in full, in relation to a particular activity, you should consider whether that activity needs to continue for the school to operate.</p> <p>Take all the mitigating actions possible to reduce the risk of transmission between staff.</p> <p>Keep activity time involved as short as possible where socially distancing is difficult.</p>		3

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

			<p>Use back-to-back or side-to-side working (rather than face-to-face) whenever possible.</p> <p>For office based staff, reduce the number of people each person has contact with by using 'fixed teams or partnering' wherever possible (so each person works with only a few others)</p> <p>Move desks/furniture to facilitate social distancing.</p> <p>Reduce the number of office/room occupants as far as reasonable to allow for social distancing whilst working, or circulating.</p> <p>Plan how shared staff spaces are set up and used to help staff to distance from each other. Use of staff rooms should be minimised, although staff must still have a break of a reasonable length during the day. Use additional spaces if available for staff to use.</p> <p>Stagger arrival and departure times if required to eliminate crowding into and out of the workplace.</p> <p>Reduce movement by discouraging non-essential trips within buildings and sites.</p> <p>Set clear use and cleaning guidance for staff toilets to ensure they are kept clean and social distancing is achieved as much as possible.</p> <p>Use remote working tools to avoid in-person meetings.</p> <p>PPE should only be used for specific tasks requiring its use.</p>		
--	--	--	--	--	--

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

	<p>Harm to staff and visitors from indirect contact with Covid-19</p>	<p>6</p>	<p>In every area, increase the frequency of hand cleaning and surface cleaning.</p> <p>All frequently touched surfaces, equipment, door pushes/handles, door edges, sinks/taps, toilet flushes, light switches, bannisters, gates, call buttons and push pads, till/servery areas and photocopier controls used during the day, will need to be cleaned thoroughly several times a day.</p> <p>Users should clean telephones and similar equipment regularly.</p> <p>Don't share equipment where possible, or where it has to be shared, wipe it down with antiviral wipes/cleaner after each use.</p> <p>Fridges and kettles can be shared, but protocols must be in place to clean by the user after each use. School to provide detergent and antiviral cleaner/wipes to do this.</p> <p>Avoid use of hot desks and spaces and, if not possible, clean and sanitise workstations between different occupants including shared equipment.</p> <p>Encourage employees to bring their own food.</p> <p>Keep windows and doors open to encourage ventilation, where possible.</p> <p>Use signs and posters to build awareness of good handwashing technique, the need to increase hand cleaning frequency, avoid touching your face and to cough or sneeze into a tissue which is binned safely, or into your arm if a tissue is not available.</p>		<p>3</p>
--	--	-----------------	--	--	-----------------

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

			<p>Provide sanitiser and antiviral sanitising wipes in each office/room.</p> <p>Provide more storage for employees for clothes and bags.</p> <p>Provide more storage for employees for clothes and bags.</p> <p>Bins are to be emptied throughout the day.</p>		
Children in nursery/preschool settings	Harm to children and staff from direct contact with Covid-19	9	<p>Nurseries/pre-schools are to consult 'Actions for early years and childcare providers during the coronavirus (COVID-19) outbreak - February 2021' at: https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/963510/2020208_actions_for_early_years_and_childcare_providers.pdf</p> <p>They may also need to consult 'Schools coronavirus (COVID-19) operational guidance - February 2021' at: https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/963541/Schools coronavirus operational guidance.pdf</p> <p>If they are in a Special School setting they are also to consult 'Additional operational guidance for special schools, special post-16 institutions and alternative provision - February 2021 at: https://assets.publishing.service.gov.uk/government/uploads/system/uploads/attachment_data/file/963557/Additional operational guidance for special schools special post-16 institutions and alternative provision.pdf and in doing so should amend any areas of this risk assessment that are necessary to comply with that</p>		3

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

			<p>guidance with regard to the operational needs of the Special School.</p> <p>Nurseries/pre-schools should assess their circumstances and decide what groups are to operate. Whatever the size of the group, they should be kept apart from other groups where possible.</p> <p>Soft furnishings are not to be used in areas that may be used by multiple groups, as cleaning can be a problem, but soft furnishings in areas used by a single group bubble can be used, as they will 'self clean' to some extent after 12 hours.</p> <p>It is recognised that 2m social distancing will not be achievable for young children.</p> <p>Designated groups of children must NOT mix with other groups.</p> <p>Nurseries/pre-schools are to keep a record of children and staff in each group. They should also record where practicable, any close contact that takes place between children and staff across different groups.</p> <p>Where possible, children to be shown how to use a tissue or elbow to cough or sneeze and use bins for tissue waste ('catch it, bin it, kill it')</p> <p>Children to be encouraged not to touch their mouth, eyes and nose.</p> <p>Where movement is necessary, plan routes wherever possible to avoid groups mixing.</p> <p>Choose which activities will be delivered. Plan outdoor lessons, where possible.</p>	
--	--	--	---	--

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

			<p>Stagger break & lunchtimes so that groups are not mixing together/moving around the site at the same time.</p> <p>Open windows and prop open classroom doors where possible and safe to do so (bearing in mind fire safety and safeguarding), but maintain reasonable room temperatures.</p> <p>Where children who usually need to have their personal care needs provided for (changing nappies, etc.) PPE should be used by staff whilst carrying out these tasks only, including face masks, gloves and aprons. PPE should not be used in the classroom generally.</p> <p>All children, except those who are clinically extremely vulnerable, can continue to attend the Nursery/pre-school.</p> <p>Supervised toothbrushing programmes may be re-established within settings using the dry brushing method. The wet brushing model is not recommended.</p> <p>Risk assessments for clinically vulnerable children, or those children with increased risk factors, e.g. BAME, born overseas, still apply, but should be reviewed if there have been any changes to the circumstances affecting the individual.</p> <p>Music, dance and drama This relates to organised group activity, not to spontaneous singing, dance and role-play that young children may naturally do, and should be encouraged to do, by early years practitioners.</p>		
--	--	--	---	--	--

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

			<p>Continue providing organised music, dance and drama as part of the curriculum,</p> <p>Singing and wind instrument playing can be undertaken in line with this and other guidance, including guidance provided by the DCMS for professionals and non-professionals, available at: https://www.gov.uk/guidance/working-safely-during-coronavirus-covid-19/performing-arts</p> <p>You can continue to engage peripatetic staff during this period, including staff from music education hubs.</p> <p>You should take particular care in music, dance and drama lessons that children remain in their usual groups.</p> <p>If staff need to move between groups of children, they should try and keep their distance from other staff as much as they can, ideally 2 metres from other adults.</p> <p>You should keep any background or accompanying music to levels which do not encourage participants to raise their voices unduly.</p> <p>You should not host any performances with an audience.</p> <p>When planning music provision, you should consider additional specific safety measures. There is some evidence that additional risk can build from aerosol transmission with volume and with the combined numbers of individuals within a confined space..</p>		
--	--	--	--	--	--

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

			<p>Government has published advice on safer singing. Measures to take include:</p> <ul style="list-style-type: none"> ● playing instruments and singing in groups should take place outdoors wherever possible ● if indoors, use a room with as much space as possible, for example, larger rooms - rooms with high ceilings are expected to enable dilution of aerosol transmission ● if playing indoors limit the numbers to account for ventilation of the space, it is important to ensure good ventilation ● position wind players so that the air from their instrument does not blow into another player ● use microphones where possible or encourage singing quietly <p>Measures to take when handling equipment, including instruments, include:</p> <ul style="list-style-type: none"> ● increase handwashing before and after handling equipment, especially if being used by more than one person ● avoid sharing instruments and equipment wherever possible ● if instruments and equipment have to be shared, disinfect regularly (including any props, microphones and music stands) and always between users, follow guidance in hygiene: handwashing, sanitation facilities and toilets <p>Create picking-up and dropping-off collection points where possible, rather than passing equipment such as props, and microphones hand-to-hand</p> <p>Individual lessons in music, dance and drama can continue in settings. This may mean teachers</p>	
--	--	--	--	--

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

			<p>interacting with pupils from multiple groups, so you will need to take particular care.</p> <p>In individual lessons for music, dance and drama, social distancing should be maintained wherever possible, meaning teachers should not provide physical correction.</p> <p>Educational Visits Educational visits should not take place at this time. This measure will be kept under review.</p>		
	<p>Harm to children and staff from indirect contact with Covid-19</p>	6	<p>Implement a hand washing routine to ensure all hands are washed at regular intervals. Ensure that help is available for children who have trouble cleaning their hands independently. You may assist children by using your own hands to help them wash their own hands thoroughly.</p> <p>Equipment and facilities should not be used by different groups unless it has been cleaned between groups, or has been left for 72 hours after use.</p> <p>Limit children taking things home and then back to Nursery/pre-school.</p> <p>Classroom based resources, such as books and games, can be used and shared within the bubble; these should be cleaned regularly, along with all frequently touched surfaces. Foggers can be used for cleaning equipment where safe to do so (not on electrical equipment).</p> <p>Resources that are shared between classes or bubbles, such as sports, art and science equipment should be cleaned frequently and meticulously and always between bubbles, or rotated to allow them to</p>		3

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

			<p>be left unused and out of reach for a period of 48 hours (72 hours for plastics) between use by different bubbles. Foggers can be used for cleaning where safe to do so (not on electrical equipment).</p> <p>Water play equipment can be used but must be confined to bowls, or open containers that can be easily cleaned and items that can be easily cleaned, or fogged.</p> <p>Gravel boxes, sand boxes, or sand pits should not be used unless they can be cleaned and the gravel/sand can be replaced, or left for 48 hours between the use of different groups.</p> <p>Equipment that cannot be wiped thoroughly, or fogged, must not be used.</p> <p>Cleaners, or competent staff, are to use fogging to clean rugs/mats/carpets where children sit daily.</p> <p>All frequently touched surfaces, equipment, and door handles, used during the day, will need to be cleaned thoroughly several times a day. This will need to be planned to occur at break times, lunchtimes, where classrooms become unoccupied and at the end of the day. Similarly, frequently touched surfaces in washing facilities and toilets will need to be cleaned after break times, lunchtimes and at the end of the day.</p> <p>Hand sanitiser to be provided in all classrooms.</p> <p>Antiviral wipes to be provided to staff in all classrooms.</p>		
--	--	--	--	--	--

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

			<p>Ensure that there is a system for reporting low quantities of essential items and regularly replenishing stock.</p> <p>Staff to keep hand sanitiser and antiviral wipes out of the reach of children.</p> <p>Staff required to carry out intimate care are to be provided training on using PPE.</p> <p>Lidded bins are to be provided and are to be emptied throughout the day.</p>		
	Harm to children from mental health issues	6	Nurseries/pre-schools are to ensure that measures are put in place to identify and support children who may experience mental health issues as a result of Covid-19, or the return to the learning environment.		2
	Harm to children from the effects of frequent hand washing, or the frequent use of hand sanitiser	4	<p>Frequent hand washing, or the frequent use of hand sanitiser can cause dermatitis in children, particularly as their skin can be more sensitive than an adults.</p> <p>Nurseries/pre-schools must ensure that, as a mitigating measure, they are able to provide an appropriate hand moisturiser that can be used where a child is experiencing unusually dry hands, in order to prevent the onset of dermatitis from repeated hand washing and/or repeated use of hand sanitiser.</p> <p>Parental consent should be obtained prior to use.</p>		2
Child drop off and collection	Harm to users from direct and indirect contact with Covid-19	9	<p>Stagger drop-off and collection times – children to arrive/collected at different times from other premises occupants where appropriate.</p> <p>Drop-off and collection times – protocols for adult to adult contact needs to be minimal. A plan needs to be in place for meeting/collection points and timings for each group.</p>		3

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

			Parents/carers limited on entering site and/or not permitted to gather at school gates and doors. Arrangements must be communicated to parents.		
Carrying out first aid and administering medicines in all settings	Harm to first-aiders and injured people from direct contact with Covid-19	9	<p>First-aid procedures should be carried out as normal, but with the use of additional appropriate Personal Protective Equipment (PPE) by the First-aider, when requested by the first-aider, where they are unable to maintain a 2 metre distance from the injured person.</p> <p>First-aiders are to be aware of the content of HSE guidance, 'First aid during the coronavirus (COVID-19) pandemic' at: https://www.hse.gov.uk/coronavirus/first-aid-and-medicals/first-aid-certificate-coronavirus.htm?utm_source=govdelivery&utm_medium=email&utm_campaign=coronavirus&utm_term=extlink&utm_content=first-aid-24-feb-21</p> <p>Administering medicines should be carried out as normal. PPE should only be used where it would normally be required, or where a 2m distance cannot be observed.</p>		3
	Harm to first-aiders, injured people and cleaning staff from indirect contact with Covid-19	6	<p>All used disposable PPE is to be double bagged on disposal.</p> <p>Non disposable PPE is to be cleaned thoroughly with an anti-viral cleaner immediately after use.</p> <p>First-aiders are to be provided training on using PPE.</p>		3
Staff in the workplace	Harm to staff from direct contact with Covid-19	9	Only where it is necessary should staff be in the workplace to carry out their assigned duties, Nurseries/pre-schools are to make arrangements for		3

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

			<p>staff to be able to work from home safely wherever possible.</p> <p>Nurseries/pre-schools leaders are to explain to staff the measures the school has put in place to reduce risks if they need to be in the workplace.</p> <p>Those employees identified through a letter from the NHS or a specialist doctor as in the group deemed clinically extremely vulnerable (CEV or shielding list) should not attend the workplace and should shield until current restrictions are lifted. Current DHSC guidance, informed by PHE, currently advises that CEV individuals should continue to shield even after they have been vaccinated. If a Clinically Extremely Vulnerable employee cannot work from home, they are not to go to work and should be recorded as Covid Shielding.</p> <p>Clinically vulnerable staff can continue to attend Nurseries/pre-schools. While in Nursery/pre-school they must follow the system of controls to minimise the risks of transmission.</p> <p>People who live with those who are clinically extremely vulnerable or clinically vulnerable can attend the workplace and should ensure they maintain good prevention practice in the workplace and home settings.</p> <p>An employer's workplace risk assessment should already consider any risks to female employees of childbearing age and, in particular, risks to new and expectant mothers (for example, from working conditions, or the use of physical, chemical or biological agents). Any risks identified must be included and managed as part of the general</p>

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

			<p>one-off contact, or added up together over one day)</p> <ul style="list-style-type: none"> ○ travelled in the same vehicle or a plane <p>Household members of those contacts who are sent home do not need to self-isolate themselves unless the child, young person or staff member who is self-isolating subsequently develops symptoms.</p> <p>If someone with symptoms tests negative for coronavirus (COVID-19), then they should stay at home until they are recovered as usual from their illness but can safely return thereafter.</p> <p>The only exception to return following a negative test result is where an individual is separately identified as a close contact of a confirmed case, when they will need to self-isolate for 10 days from the date of that contact.</p> <p>A confirmed case of Covid-19 (in respect of employees only) may be reportable to the HSE by the Headteacher under The Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 2013 (RIDDOR) where there is reasonable evidence that a work-related exposure to Covid-19 is the likely cause of the disease in an employee. Before making a report further guidance should be consulted at: https://www.hse.gov.uk/coronavirus/riddor/riddor-reporting-further-guidance.htm#disease-law</p>		
Permitting contractors on site (all settings)	Harm to contractors, staff and children from direct contact with Covid-19	9	<p>No contractors can enter the site if they have symptoms.</p> <p>Contact all contractors (food, cleaning, maintenance etc) to ensure they are aware of school protocols.</p>		3

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

			<p>The normal safeguarding arrangements apply.</p> <p>Contractors who have long term contracts and have staff regularly on school sites (e.g. caterers, pfi, cleaners, cover) will be offered LFD test kits for their staff to self swab and test themselves twice a week at home. Contract staff must report their result to NHS Test and Trace as soon as the test is completed either online or by telephone as per the instructions in the home test kit. They should also share their result, whether void, positive or negative, with their school to help with contact tracing.</p> <p>Individuals with a positive LFD test result will need to self-isolate in line with the <i>'Stay at home: guidance for households with possible or confirmed coronavirus (COVID-19) infection'</i>. They will also need to arrange a lab-based polymerase chain reaction (PCR) test to confirm the result if the test was done at home.</p> <p>Contract staff who test positive for coronavirus (COVID-19) can return to their normal routine and stop self-isolating after they have finished their isolation period and their symptoms have gone or if they continue to have only a residual cough or anosmia. This is because a cough or anosmia can last for several weeks once the infection has gone. If they still have a high temperature after 10 days or are otherwise unwell, you should advise them to stay at home and seek medical advice.</p> <p>Those with a negative LFD test result can continue to attend school unless they have individually been advised otherwise by NHS Test and Trace or Public Health professionals (for example as a close contact). They should continue to apply the measures in the</p>

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

			<p>system of controls to themselves and the wider school setting.</p> <p>Contractors are not to be prevented from being on site because they have not completed a LFD test.</p> <p>Contract staff living with someone who is showing symptoms, or has tested positive in the last 10 days, must not attend for at least 10 days from the day after the start of the person's symptoms, or from their test date if they did not have any symptoms but have had a positive test.</p> <p>Contractors must have procedures for maintaining social distancing/protecting each other and ensuring proper hygiene (HSE requirements), as well as a mechanism for reporting any potential COVID-19 cases to the school. This should be in the form of an additional Coronavirus Risk Assessment and additional Method Statement where applicable.</p> <p>Individual/infrequent contract workers must be able to socially distance whilst completing the work, or be suitably protected using PPE if social distancing is not possible. Contact with staff and pupils must be controlled.</p>		
	Harm to contractors, staff and pupils from indirect contact with Covid-19	6	Discuss any additional cleaning requirements with cleaning contractors/cleaning staff and put in place.		3
Permitting visitors/parents/carers on site (all settings)	Harm to visitors staff and children from direct contact with Covid-19	9	<p>No visitors/parents/carers can enter the site if they have symptoms.</p> <p>In instances where settings need to use other essential professionals such as social workers, speech</p>		3

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

			<p>and language therapists or counsellors, or other professionals to support delivery of a child's EHC plan, settings should assess whether the professionals need to attend in person or can do so virtually.</p> <p>If they need to attend in person, they should:</p> <ul style="list-style-type: none"> ● follow guidance relevant to the setting ● keep the number of attendances to a minimum ● be informed about the 'system of controls' <p>Parents and carers are able to enter a setting to help their children adapt to their new environment.</p> <p>Settings should ensure that parents and carers:</p> <ul style="list-style-type: none"> ● wear face coverings, if required, in line with arrangements for staff and other visitors to the setting ● stay for a limited amount of time (ideally not more than an hour) ● avoid close contact with other children ● are aware of the 'system of controls', how this impacts them, and their responsibilities in supporting it when visiting a setting with their child <p>In-person visits from parents and carers can take place if they are necessary but settings should make use of remote visits wherever possible. Settings should work with parents and carers to ensure they still have visibility of the childcare environment during this time, including through the use of remote visits, pictures and phone calls.</p> <p>Where face to face meetings are unavoidable appointments must be staggered to avoid congestion and effective social distancing must be implemented.</p>		
--	--	--	---	--	--

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)

			<p>Nurseries and pre-schools are to ensure site guidance on physical distancing and hygiene is explained to visitors on or before arrival. Where visits can happen outside of Nursery/pre-school hours, they should. A record should be kept of all visitors with sufficient detail to support rapid contact tracing if required by NHS Test and Trace.</p> <p>Limit numbers of people in reception areas and where required implement queueing protocols the same as shops.</p> <p>Install a sneeze screen on the reception desk if it is required.</p>		
	Harm to visitors, staff and children from indirect contact with Covid-19	6	<p>Ensure that entrance doors are cleaned several times daily and at least after the start of a session, after lunchtime and after a session, as a minimum.</p> <p>Hand sanitiser is to be provided in all reception areas.</p>		3

Risk Control

Risk control is a method of managing the risk with the primary emphasis on controlling the hazards at source. For a risk that is assessed as “high”, steps should be taken immediately to minimize risk of injury. The method of ensuring that risks are controlled effectively is by using the “hierarchy of controls”. The Hierarchy of Controls are:

Order No.	Control	Example
Firstly	Eliminate	Removing the hazard, eg taking a hazardous piece of equipment out of service.
Secondly	Substitute	Replacing a hazardous substance or process with a less hazardous one, eg substituting a hazardous substance with a non-hazardous substance.
Thirdly	Isolation	Isolating the hazard from the person at risk, eg using a guard or barrier.
Fourthly	Engineering	Redesign a process or piece of equipment to make it less hazardous.
Fifthly	Administrative	Adopting safe work practices or providing appropriate training, instruction or information.
Sixthly	Personal Protective Equipment	The use of personal protective equipment could include using gloves, glasses, earmuffs, aprons, safety footwear, dust masks. NOTE: This is a last resort control and should be for interim periods only, while higher level control is developed or implemented.

Combination Risk Assessment for Complex Hazards

(To be used for activities such as; work at height, hot work, work with asbestos, work with machinery, etc.)
